

AI Workspace Setup Checklist

Getting Started — Your AI Workspace

Use this checklist to set up your AI tools properly from day one.

Account Setup

- Create a free ChatGPT account at chat.openai.com
- Create a free Claude account at claude.ai
- Bookmark both in a 'AI Tools' browser folder
- Use your BUSINESS email, not personal

Your Business Context Document

Create a text file with this info (you'll paste it into AI conversations):

- Your role/title: _____
- Your business type: _____
- Number of employees: _____
- Your typical clients/customers: _____
- Your communication tone (formal/casual/warm): _____
- Industry-specific terms to use: _____
- Terms to NEVER use: _____

First Test

- Paste your business context into ChatGPT or Claude
- Ask: 'Based on this context, write a short email to a client about [real topic]'

- Compare the output to how you'd actually write it

- Note what it got right and what needs adjusting

Congratulations — your AI workspace is set up and ready to use throughout the course.
